

# Merrimack Village District

Belmont Booster Zone Customers,

On Wednesday December 4<sup>th</sup> 2019 Merrimack Village District staff will be repairing the Belmont Booster. The Belmont Booster will have to be shut down for these repairs. This will reduce the water pressure to your home, but you should still have water. If there is complete loss of service to your home please call the office, or email below. The feedback is important to us as it helps in planning events in the future and dealing with emergencies.

We will be replacing two (2) 2” manual valves, internal to the booster, that fail to close and shut water off to the booster pumps. These repairs are in preparation for the rebuilding/ replacing of the booster pumps themselves. Without the replacement of the valves the duration of the shutdown, for the pump repairs, would be lengthy and un-necessary. As any mechanical repair goes, there are almost always aspects that are unforeseen and may lengthen repair times.

Merrimack Village District has tried to schedule the work to coincide with conventional business hours, so that demands are low. We thank you for your understanding as we maintain your water system and maximize the life of its assets.

Respectfully,

*David Fredrickson*
